

Luna Moth Sun Catcher

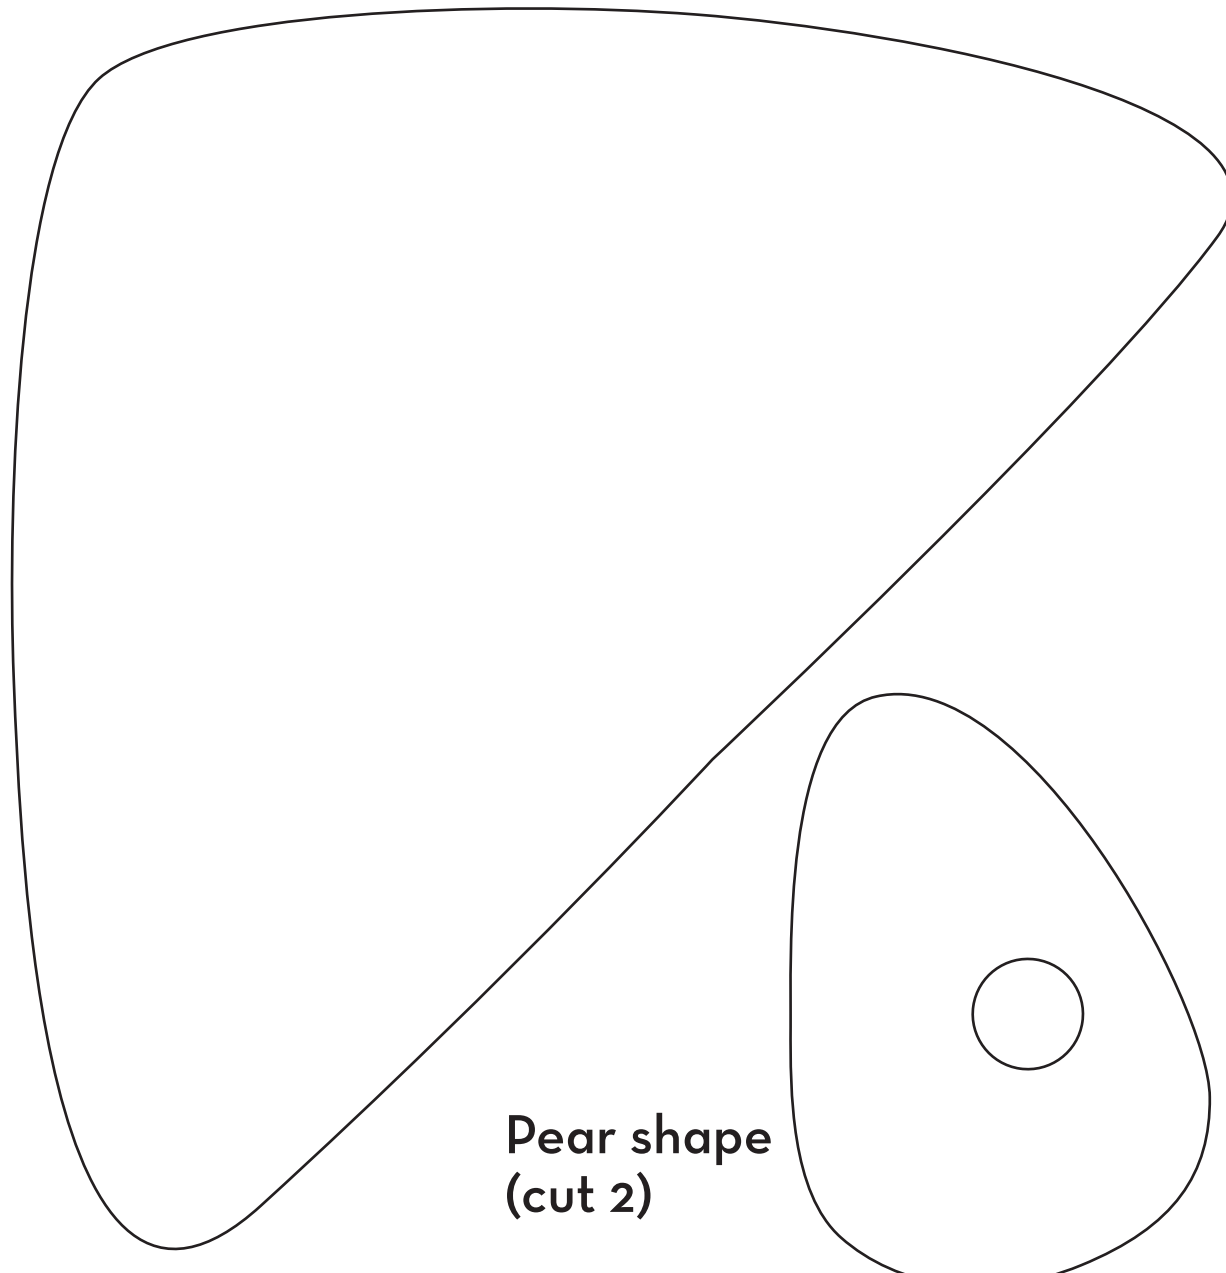

Instructions:

1. Use this pattern to cut a piece of clear plastic into the shape of the luna moth's wings.
2. Cut light green tissue paper so that it covers the plastic shape.
3. In a small dish, mix two parts glue with one part water. Then brush the mixture over the tissue paper. Set aside to dry.
4. Cut two pear shapes out of darker green tissue paper. Make a small hole in each and then place them on the moth's wings. Paint over them with the glue mixture. Set aside to dry.
5. Glue a brown pipe cleaner around the top edges of the moth. Use a white pipe cleaner to make the moth's antennae and a green pipe cleaner to make its tails. Glue the antennae and tails onto the moth.
6. Use a brown marker to make the moth's eye spots.
7. Hang in the window and enjoy!
