

Bath Time Apples

Instructions:

1. Print out the apple pattern and cut it out.
2. Use the pattern to trace outlines of apples (as many as you want) on craft foam. Cut out the apples out of the foam.
3. Before bath time, have your child gather the apples. Count how many apples you have. As you wait for the bath to fill, dip the apples into the water and stick them to the side of the tub wall. Count them as you put them on the wall. When the tub is filled, and the apples are up, have your toddler “pick” them off and count along.
4. Try making apples with different colors of craft foam. That way, you can practice colors and grouping during bath time!
